What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of Lux Multimanager SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However, the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

The Sub-Fund is actively managed and seeks to provide long-term capital growth via stock selection focused on quality companies, with a Swedish perspective.

The Sub-Fund seeks to create long-term capital growth via stock selection focused on quality companies, using Fundamental analysis.

To achieve the investment objective, the Sub-Fund will mainly invest, minimum 70% of its assets, in equities and equity related instruments.

Swedish equities mean equity instruments issued by an entity domiciled in Sweden and/or whose equity instruments are traded on a regulated market domiciled in Sweden.

The Sub-Fund may also invest up to 20% of its assets in equities or equity related instruments issued by companies domiciled in the Nordic region and that are traded on a Regulated Market.

The investment manager may consider interesting investment opportunities outside of the Nordic region for a maximum weight of 10% of its assets.

The Sub-Fund may also invest up to 30% of its total net assets in money market instruments and money market Funds.

This Class is cumulative. Dividend distributions are not planned.

The return of the product is determined by using the net asset value calculated by the Central Administration. This return depends mainly on the market value fluctuations of the underlying investments.

The Sub-Fund's assets are segregated from assets of other Sub-Funds of the Fund. The assets of the Sub-Fund cannot be used to pay debts of other Sub-Funds.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

INTENDED RETAIL INVESTORS

The product may be suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level. Poor market conditions will likely impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years SEK 100 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs Average return each year	SEK 55 900 -44.1%	SEK 17 000 -29.9%	
Unfavourable scenario	What you might get back after costs Average return each year	SEK 74 500 -25.5%	SEK 75 300 -5.5%	This type of scenario occurred for an investment in the proxy then the product between March 2015 and March 2020.
Moderate scenario	What you might get back after costs Average return each year	SEK 106 800 6.8%	SEK 143 100 7.4%	This type of scenario occurred for an investment in the proxy then the product between September 2015 and September 2020.
Favourable scenario	What you might get back after costs Average return each year	SEK 213 000 113.0%	SEK 229 300 18.1%	This type of scenario occurred for an investment in the product between July 2016 and July 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if BIL Manage Invest S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with RBC Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the SICAV. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- SEK 100 000 is invested

Investment of SEK 100 000	If you exit after 1 year	If you exit after 5 years
Total costs	SEK 1 112	SEK 7 563
Annual cost impact (*)	1.1%	1.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5% before costs and 7.4% after costs.
